Biographical Summary

I am a life long Taos resident who grew up in a family of General Contractors, Designers and Architects. I am a graduate of the Taos Public School System and hold a BA in Architecture from the University of NM.

I have over 15 years of professional experience directly related to the field of Architecture, Engineering and General Construction. I have worked within the full range of these disciplines; from Laborer to Project Manager for multi-million dollar projects. I have worked for Architects, Engineers, and General Contractors.

While my primary focus is Design, I have a long history in Construction and Structural and Civil Engineering; with this combination I produce designs and drawings that are efficient, budget conscious and ready for construction. I often supervise the construction of my projects, participating in hands on problem solving, subcontractor selection and taking an integral role in the process from design to occupancy.

I am the owner of Magee Design, LLC, which offers Residential Design Services, Construction Management and Sustainable Systems Consulting. I have designed over twenty homes ranging from modest and efficient projects to multi-million dollar houses. My designs have incorporated a full range of materials and styles, contemporary and traditional, using Frame, Adobe, Pumice, Rastra, E-Crete, and Straw Bale. My designs have incorporated passive solar, non toxic materials, water catchments, grey water, solar photovoltaic systems and active hot water solar systems. I am LEED certified by the United States Green Building Council.

On a personal level I bring the knowledge and experience of living and doing business in a small community. I have outstanding relationships with building officials, members of the planning and zoning department and members of the planning and zoning commission as well as the current Town Council. I understand the intricacies of conducting business in a small Community and have learned how to maximize the process through personal relationships. I am comfortable in front of large groups of people and have earned the respect of my associates by way of establishing trust from the beginning of any endeavor.

I am the President of the Board of Trustees of a Non Profit that oversees a K-8 private school and a growing agricultural project for youth and a center for Sustainable Agriculture. I Coach Soccer for the Taos Youth Soccer League and I serve on the Board of the Taos Arts and Culture Steering Committee.

I am the father of two boys and married to my High School Sweetheart of twenty years.

I look forward to hearing from you.
